AI Builders Electric

Capability statement

Commercial | Multifamily | Public works

November 2026

Electrical construction, renovations and major equipment upgrades for commercial facilities, multifamily properties and public-works projects. Residential service, remodels and ADUs are also part of our work.

CSLB #1033090
C-10 Electrical | B General Building

DIR registration #1000060370
California public-works contractor registration

What we do

Commercial construction

Tenant improvements and new construction; distribution, lighting controls, equipment circuits and low-voltage/network wiring.

Multifamily upgrades

Meter banks, switchgear, service equipment, unit and house subpanels, and replacement of aging electrical equipment.

Public works

Institutional construction and renovation. Documentation and coordination are reviewed against the bid requirements.

Homes and ADUs

Complete wiring, remodels, panels, lighting, controls, EV charging and smaller electrical repairs.

More than 100 years of combined team experience.

Selected completed work

Culver City multifamily property

14 buildings and a clubhouse; 532 meters, approximately 350 in-unit subpanels and 15 common-area/elevator switchgear assemblies.

Lynwood veterinary hospital

Facility-wide electrical renovation; 600A single-meter service; exam, surgery, laboratory and X-ray equipment connections; interior and exterior lighting.

Rancho Cucamonga college

Tenant improvement and kitchen work; wiring for a new structure and upstairs offices; backup generator and automatic transfer switches; pathway and outdoor seating-area lighting.

Where we work

Greater Los Angeles and the listed Ventura County communities. **Riverside-area work: commercial and public-works projects only.**
